PPE PRESENTATION

Public hygiene into the next level; disinfection from Skin to Clothes

With the outbreak of covid-19, it is becoming more and more vital to keep citizens safe in public places.

Yes, germs can stick to clothes; and yes, clothes can spread germs threatening the lives of people.

It's time for us to join hands and spread hygiene awareness outside the home: stepping into secure public places against diseases and viruses through an innovative anti-bacterial structure that disinfects clothes:

"The Safety EveryWear Machine"

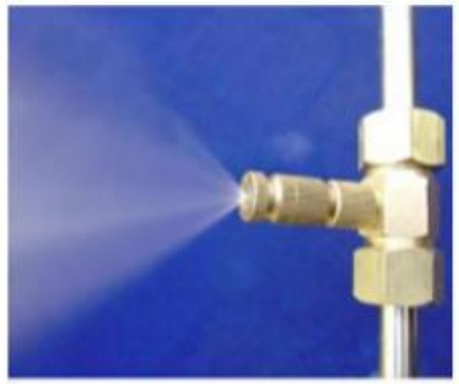
MISTING KIT AND NOZZLES

Dimensions: l. 472 w. 374 h. 332 mm
Weight: 20-22 Kg. - 550-1250W



Dimensions: l. 490 w. 410 h. 300 mm
Weight: 22-25 Kg - 550-1250W

The kit for misting systems can be realized in different ways:

- Mist pump with poly tubing
- Mist pump with copper (nickel platted) tubing
- Mist pump with stainless steel tubing

Every range of misting kits utilizes 1000 psi (or 70 Bar) pumps, different length of poly/copper/stainless steel tubing, a filter assembly with filter cartridge, nozzles, fans and all the needed fittings to connect the line.

We have the ability to provide customized mist kits using a variety of different components and design. The number of nozzles depend on specific system requirements and the high-pressure pumps can be customized to enhance the performance and functionality of a designed misting system.

ensions: l. 1010 w. 440 h. 500 mm
ght: 37 Kg - 800-1000W

These 10 and 12 mm fittings features high quality and robustness. Made by S.Steel they ensure the best corrosion resistance, they can be cleaned with acids. The special fittings have been engineered to withstand pulsations produced by timers and their design allow faster installation. Nozzle holder direction can be adjusted and the fittings are easily removable.

UVC TECHNOLOGY

WHAT IS UVC GERMICIDAL LIGHT?

UVC wavelengths are between 250 and 280 nanometers, making them germicidal – meaning they are capable of inactivating microorganisms, such as bacteria, viruses and protozoa.

HOW DOES UVC LIGHT WORK ?

The high energy from short wavelength UVC light damages the DNA of bacteria and viruses thereby preventing replication and ability to infect.

OUR UVC DISINFECTION PRODUCT RANGE

All our UVC products are mercury free and hence environmental friendly. Our products have been tested to be effective in disinfecting 99.9% bacteria such as E. Coli and Staphylococcus.

UVC SMART PHONE STERILIZER

UV-C sterilizer pouch that kills up to 99.9% of the bacteria on the item kept inside the pouch. Place objects like phone, earbuds, jewelry, watches and facemask inside the pouch and connect to a charging source such as a laptop or powerbank (for up to 5 min) to 100% sterilize them using UV-C technology. The external material of the pouch is treated with Antimicrobial agents for extra safety. The 2 UV-C LED light inside is non-toxic and made without mercury (beware of many UV lamps in the market) The lights have a lifecycle of 10.000 hours.
